

Noblesville High School Enhances Staff Foodservice with Structural Concepts' Autonomous Retail Merchandiser

Noblesville High School, in **Noblesville, Indiana**, had the challenge of enhancing the onsite foodservice experience for its large number of faculty and staff by increasing the level of convenience and offering more menu selections instead having them rely on accessing the student cafeteria lines.

After conducting a thorough review of several other manufacturers to meet their needs, the school determined that the Autonomous Retail Merchandiser (ARM) was the best fit.

Among the many benefits offered by the cashier less ARM, several key factors stood out in relation to the competition that drove the school’s decision to install the unit.

No Barcode
Scanning
Requirements

Easy to Set Up
and Calibrate
Shelves

Seamless
Programming
Process

Reduction in
Labor Usage

In addition to experiencing several improvements – a heightened level of convenience for its staff and better connectivity between users and its foodservice department – the school has also made significant financial gains as part of this investment.

INCREASE IN SALES AND POSITIVE ROI

AVERAGE SALES PER WEEK

\$695.00

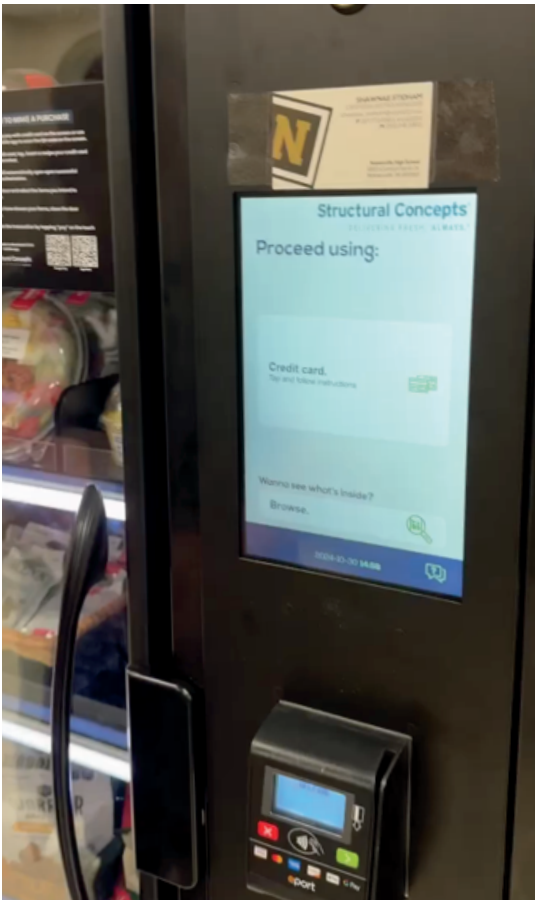

AVERAGE SALES PER MONTH

\$2,935.00

1.5 YEARS TO PAYOFF VS. INITIAL 4 YEAR PROJECTION

“I’ve had a great overall experience with Structural Concepts – and our school has benefited from it astronomically.”
